New Permanent Makeup Technologies

Make a Difference
in People's Lives

INTRODUCTION

NPM Ltd. was established in 2005 in the vicinity of Israel's northern shoreline, in a high-tech industrial and technological park.

NPM's innovative products - ORON series, ILAY series, and GLOW series, for permanent make-up and micro-pigmentation, as well as our easy to operate Hand-Pieces, are currently sold all around the world and can be found at leading institutes.

NPM is a world leader specializing in the technique of inserting pigments into the skin, improving appearance and emphasizing the existing natural lines. NPM also specializes in aesthetic reconstruction with medical backup of tones and colors based on the skin areas.

With NPM's experience and the extensive Research and Development in the field of permanent makeup and micro-pigmentation, NPM launched a series of products which have amazing and accurate results in aesthetic improvement and repair.

Our recent line of products consists of the GLOW series devices, the HFS roller (USA Patent No. 61-561,949) along with our needles and colors collection (PMU & HFS pigments). NPM's devices, accessories and

pigments are manufactured in accordance with strict quality assurance standards and meet the most stringent international standards. We are officially recognized by the medical authorities in Europe and America:

- All NPM devices are produced under strictest regulations of manufacturing protocols.
- Medical equipment EN 60601-1:90+A1:93+A2:95+A13:96
- Medical equipment IEC 60601-1:88+A1:91+A2:95
- CE - NPMSAF-18837C
- FDA approved
- MSDS reports
- ISO 9001 and ISO 13485

Our products are proudly covering a full range of micro-pigmentation treatments such as permanent makeup, hair follicle simulation & aesthetic paramedical treatments.

All of our solutions in the micro-pigmentation field employ the most recent techniques & technologies based on sophisticated computerization and design. NPM is now recognized as an international leader in the field of micro-pigmentation with a worldwide distribution chain covering over 28 countries in five continents and is continuing to grow.

NPM | INTERNATIONAL
New Permanent Makeup Technologies

M MOSHE ALUL Founder and CEO

“Make a difference in people’s lives” is Moshe Alul’s motto, with his persistent desire and motivation, today he feels the fruits of his achievement through the reaction of his customers. Moshe was born and raised in Israel and comes from a family that values hard work and determination. In 1998 he married his long time sweetheart Vered, now the mother of his three children.

Founder and CEO of NPM International, Moshe Alul is considered one of the foremost authorities on permanent makeup and cosmetic tattoos procedures.

In 2005 Moshe Alul established his company NPM International with his wife Vered, making the move from a career of 28 years in the tattooing business.

Moshe is a strong believer in his Hair Follicle Simulation (HFS) and is not only the CEO, but also a client. Moshe had the HFS procedure done so that he can relate to clients on a personal level.

The Company is engaged in producing and developing a series of devices, accessories and technologies.

The ORON series (which is named after his

oldest son), are designed for Permanent Make-up and micro-pigmentation. Moshe Alul has travelled the world to share his method and knowledge gained over the years with clients all around the world through conferences and seminars to professionals, who believe in his system that guarantees permanent makeup and Hair Follicle Simulation at a very high level with minimum time and most importantly with a beautiful result.

Moshe Alul argues that in order to succeed in the field and present a high-level result there are four parameters: MAPS

- **Mechanics of the instrument**
- **A Skilled artist**
- **Pigment of high level**
- **Structure of the needles**

In 2012, Moshe Alul has again stunned the market with his trademark method which solves the problem of baldness in women and men; the patent is the company’s flagship product – a revolutionary roller. The roller was invented as an additional part of a permanent makeup system using state-of-the-art technology to perfect a youthful, fresh appearance and an impressive solution to balding in both men and women. The roller’s spring system vibrates a cluster of 56 needles that are positioned on the roller wheel in a cross-weave pattern. By moving the roller on the scalp, tiny pigment points that resemble hair follicles form.

With the roller system, large areas are filled within several minutes, resulting in a completely realistic texture.

Moshe Alul promises to always be in continues technological progress and follow his motto, “Make a difference in people’s lives”

GLOW *Unlimited*

UNLIKE ANY OTHERS

Unleash your inner potential with our most sophisticated device ever.

The GLOW Unlimited has a 13.3" wide HD touch screen, for bright and clear operation.

It features high-tech inspired graphic designs

GLOW 10

PERFECTLY BALANCED, AS ALL THINGS SHOULD BE

The GLOW 10 device is equipped with a 10" wide HD touch screen.

It features modern graphic design which suits perfectly any working surface.

GLOW7

COMPACT, YET POWERFUL

The GLOW 7 device is the smallest of the three. It has a 7" wide HD touchscreen and features a simple and aesthetic graphic design.

The GLOW 7 is equipped with an incredibly durable aluminum metal case

LEARN + SHARE + PERFORM YOUR ART

Our brand new GLOW will be the only thing you'll ever need to **perform your art and treatments**

First ever permanent makeup device with **WiFi built in**

GLOW will be your new **professional social network** that includes training and an information center

With GLOW you can manage your customers, it can also do your **calendar management**

Looking for a device that can automatically pick the **speed and needles** you need? You got it already inside

Professional, High quality **video tutorials** from leading masters around the world

Portable and easy to use – just plug in and let the magic begin

Supports **two Hand-Pieces** simultaneously for easy continuous work

International **Web Store** within the device, to easily buy and restock all needed equipment

Exclusive tips & recommendations from leading permanent makeup artists & masters

Power saving mode that allows continuous work

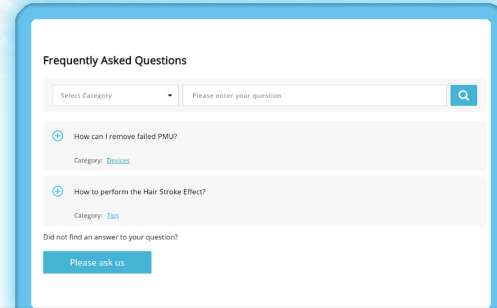

Built-in **RGB LED** with custom color shades

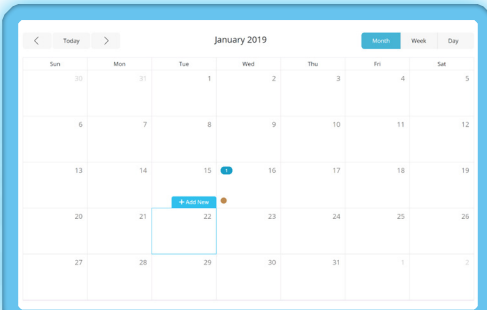

GLOW ONLINE FEATURES

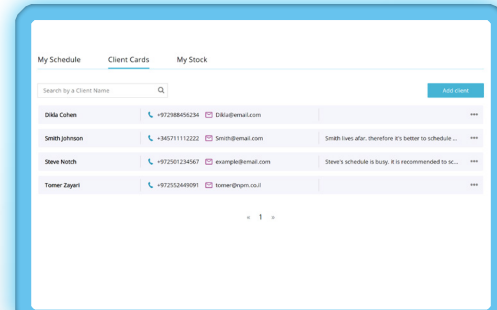

Learn and improve from watching exclusive video training and guides, from the world's top PMU masters, directly on the device screen.

Find the answers to any of your questions, related to the device operation or treatments use, through the online information center.

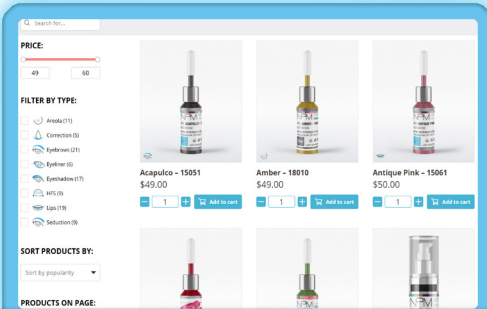

Manage your schedule in an easy and efficient way. Organize your upcoming appointments, or view the history of past treatments which you've performed.

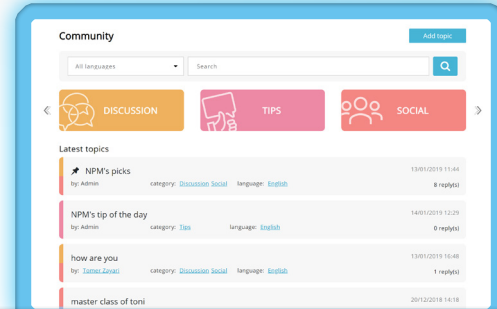

Document your clients' details, such as contact information, special preferences, skin info, allergies, past appointments, and other important notes.

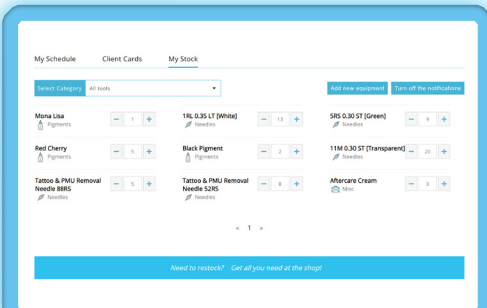

GLOW ONLINE FEATURES

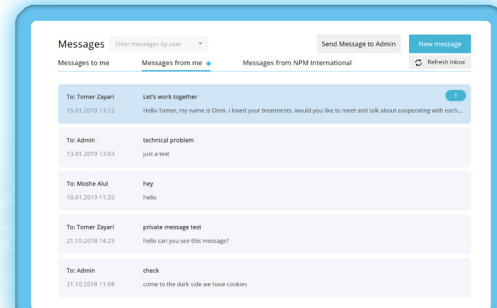

Shop online directly and in real time, from NPM International web store and partners. Buy all your needed equipment right through the device.

Be part of the world's leading PMU artists community! Discuss, socialize, and share online through NPM's exclusive forum platform.

Keep track of your stock, including: pigments, needles, devices, and more. Never run out of equipment again!

Stay connected to other artists, with online private messaging. Real-time conversations and notifications directly on the device.

ORON 56

**TOP-RATED
POWERFUL MACHINE
SPECIALLY DESIGNED
FOR PERMANENT MAKEUP
BEST PERFORMANCES**

ORON 56

PMU Device

The Power and control unit consist of the needles PCB with digital controller using a low voltage device Technology (LVD) for improved electrical safety which enable to control the needle power and motor rotation speed. The digital system is seated in a laser crafted heavy aluminum body. The operational Handle includes a powerful and quiet motor. The aviation standard motor provides sufficient power to drive the large combination of needle that NPM has developed. The handle and the integral needles help to create sharp and clean lines. The needle goes up and down into the same point and there are no deviations from the desired design. The handle enables to adjust the height

of the needles to support the various treatments. The operational pedal controls the motor operation and free up your hands to allow you to perform an accurate treatment. When the motor stops, the needle goes back into its place, so when it takes the color, the needle remains whole and the client is not injured during the treatment.

ORON 56 PMU Device

- ▶ Sharp & accurate performances
- ▶ Large variety of needles & pigments provide you unlimited options
- ▶ Top quality - CE certificate, ISO standard and FDA standards
- ▶ Excellent customer service
- ▶ Full training support
- ▶ 1 years warranty

Tested for compliance with the following standards:

CE standard

Manufacturing Assembling under standard: ISO 13485
ISO 9001

ORON 56 system including the following components:

- AC power Adapter

ORON57

**ALL IN ONE SOLUTION
SUITABLE FOR PMU,
HAIR FOLLICLES SIMULATION
& PARAMEDICAL TREATMENTS**

ORON 57

Device

NPM Permanent Makeup Machine the ORON 57 introduces savings in 80% of the treatment time. This means more spare time for you and less suffering for the client. Such a performance is achievable due to the advanced technology throughout the product design and manufacturing. The ORON 57 a perfect device for either the beginner or the advanced technician. The ORON 57 is a high quality device with a simple but exquisite design which has a performance to satisfy even the most advanced technician, and most important of all an amazing end results. Its simple design, precise handling and great functionality make it a must have device for every Permanent makeup artist and Micro-pigmentation technician.

ORON 57 Device

ORON 57 system including the following components:

- Power and control unit
 - Operational handle
 - Operational pedal
 - AC power Adapter
- ▶ Extremely powerful & very quiet machine

ORON 58s

PMU Device

Live the new experience of NPM technology! Meet the ORON 58s: A modern rectangle design shape combined with a beautiful choice of engraved surface for the outer look but the inside still with the best technology. The new ORON 58s contains 7" HD touch screen, easy to use with during work. Automatically set the recommended RPM speed according to the chosen treatment. The minimum speed of the ORON 58s is 100 and with a maximum speed of 200, it should be able to cover all your required treatments.

The ORON 58s' precision control will make your work a great pleasure. The aluminum body is easy to clean and maintain. This elegant design and friendly to use technology will surely captivate all new technicians.

ORON 58s

PMU Device

THE BRAND NEW ORON 58S IS A SIMPLE MACHINE TO USE, WITH FUNCTIONS THAT ARE EASY AND CLEAR AT AN AFFORDABLE PRICE; A REAL EYE CATCHER FOR BEGINNERS AND THE EXPERIENCED ARTIST.

ORON 58s system including the following components:

ORON 60

**OUTSTANDING
TECHNOLOGY & FLAWLESS
PERFORMANCE IN
PERMANENT MAKEUP
AND MICRO-PIGMENTATION
WORK & TREATMENTS.**

ORON 60
NFM INTERNATIONAL
New Permanent Makeup Technologies

ORON 60

PMU Device

With its innovative design, beautiful silver color and its spectacular LED lighting at the bottom of the device, the ORON 60 will surely attract the eye of the connoisseurs. The ORON 60 is equipped with a 3.5" full color screen, a complete detailed menu available in 7 different languages: English / French / Spanish / Russian / Italian / German and Hebrew. Designed to be user friendly, the beginner technician to the most experienced one will enjoy its full capacity of features. The ORON 60 is simple to use, featuring pre-programmed speeds, needles and treatments. All the technician needs to do is choose the

treatment and the ORON 60 will choose the needle and the appropriate speed. It's as simple as ABC. Device maximum power and speed will reach over 6000 rpm. A variety of needles are available to suit all types of procedures, all needles are 100% sterilized and are for one time usage.

ORON 60 PMU Device

ONE OF MOST ADVANCED DEVICES IN THE WORLD WITH OUTSTANDING TECHNOLOGY WHEN IT COMES TO THE FIELD OF PERMANENT MAKEUP AND MICRO PIGMENTATION.

The ORON 60 is optimized for the use of the NPM series of cartridges needles and roller (USA Patent No. 61-561,949). The device has two outputs which allow the technician to use two different types of hand pieces. Also available with the ORON 60 is one of three hand pieces that could be adapted to our device. The "feather touch" hand piece that has been developed and adapted to this special model was crafted by Moshe Alul himself, light in weight and high end engineering is sure to please any experts in the field of Permanent makeup. The concept behind the creation of this hand piece was to give the artist that soft and gentle movement to create exquisite lines. The hand piece has its own stand that matches the design of the device. The ORON 60 device was developed to achieve

faster results and higher levels of quality in the fields of permanent makeup and hair follicles simulation. An extra feature already integrated into the system but will be available in the near future is that the device is equipped with a memory card where the user will be able to insert images of previous work done and present them to the customers.

After

HFS

The HFS (Hair Follicle Simulation) Technology was developed by the method's inventor Moshe Alul, it was invented as an additional part of a permanent makeup system using state-of-the-art technology to perfect a youthful, fresh appearance and impressive solution to balding, thinning hair & hair loss in both men and women.

Latest technologies and extensive experience was invested in the development of our HFS roller (USA Patent No. 61-561,949) in order to achieve completely natural and long-lasting results.

The roller's spring system vibrates a cluster of 56 needles that are positioned on the roller wheel in a cross-weave pattern.

By moving the roller on the scalp, tiny pigment points that resemble hair follicles form.

With the roller system, large areas are filled within several minutes, resulting in a completely realistic texture with remarkably accurate appearance as a hair follicle.

NEEDLES COLLECTION

NPM'S NEEDLES COLLECTION CONTAINS A SELECTION OF OVER 20 DIFFERENT SHAPED NEEDLES, SPECIALLY DESIGNED TO COVER ALL RANGES OF PERMANENT MAKEUP TREATMENTS

NEEDLES

The line of screw system is made unique for NPM needles from 316L ROSS stainless steel. This material is licensed for medical use with MSDS report. NPM's needle is one integral unit, meaning the needle and the cover body is one unit, This ensures the needles will stay aligned at all time during its operation. Furthermore, the needle designed to suck the color and to release it only when the needle in touch with the skin which reduces spills and keep a clean professional treatment. NPM needles are the only PMU needles in the world that

contain **"wings"** on the main pin located inside of the needle cartridge. There are two small wings which function to avoid unstable side movements of the needle. While the motor stops, the needle will stay inside. The needles are disposable, for one time use only in order to meet the sterilization standard for medical treatment. All needles apply to Biocompatible standards(BF). In NPM needle collection, you can find 21 different types of needles for all required applications.

Permanent Makeup & Tattoos

PMU & TATTOO REMOVAL

For centuries tattoos were popular for various reasons such as: social status, traditions, fashion and more. In recent years permanent makeup treatments became popular typically on the face. Unfortunately, there are many bad results, discoloration of the result, unfit design, or simply the client dislikes it and wishes that it will be removed.

NFM

INTERNATIONAL

PMU Colors Collection

NPM Pigments Technology:

Color is of great importance to the outcome of the makeup. NPM is providing a selection of stable pigments with over 60 shades. Inside each bottle of color, there is a small stainless steel ball, whose purpose is to mix the color uniformly while shaking the bottle. This method ensures correct mixing ratio between the pigments powder to liquid. This helps to maintain the color quality over time and to prevent the pigment from drying out. All NPM shades come in 12 ml. bottles and they can be mixed together to produce Sub shades.

Correction colors:

According to Isaac Newton color theory, he states that complementary colors are also neutralizing colors. For example, when one color is placed on top of the other they cancel each other effect. This is how we find 'repair shades', designed to 'neutralize' the shade in the brow. With the vast experience that NPM has acquired through the years, we've decided to produce pigments that neutralize the red and blue already existing in the pigment in order to prevent customers from doing unnecessary mixing of colors or adding any elements that may end in not getting the end result wanted by our customers.
